

Behavioral Pharmacology of Orally Administered THC and D-limonene

NCT06378957

Status	RECRUITING
Phase	Phase 1
Sponsor	Johns Hopkins University
Enrollment	65 participants

Key Eligibility Criteria

Inclusion (9)

- Have provided written informed consent
- Be between the ages of 21 and 55
- Be in good general health based on a physical examination, medical history, vital signs, and screening urine and blood tests
- Test negative for drugs of abuse other than cannabis, including breath alcohol at the screening visit and at clinic admission
- Not be pregnant or nursing (if female). All females must have a negative serum pregnancy test at the screening visit and a negative urine pregnancy test at clinic admission.

... and 4 more (see full listing online)

Exclusion (8)

- Non-medical use of psychoactive drugs other than, nicotine, alcohol, or caffeine 3 month prior to the Screening Visit;
- History of or current evidence of significant medical (e.g. seizure disorder) or psychiatric illness (e.g. psychosis) judged by the investigator to put the participant at greater risk of experiencing an adverse event due to exposure or completion of other study procedures.
- Use of an over the counter (OTC), systemic or topical drug(s), herbal supplement(s), or vitamin(s) within 14 days of experimental sessions; which, in the opinion of the investigator or sponsor, will interfere with the study result or the safety of the subject.
- Use of a prescription medication (with the exception of birth control prescriptions) within 14 days of experimental sessions; which, in the opinion of the investigator or sponsor, will interfere with the study result or the safety of the subject.
- Average use of cannabis more than 2 times per week in the prior 3 months.
