

# A Study of Efgartigimod PH20 SC in Children Between 2 and Less Than 18 Years of Age With Generalized Myasthenia Gravis

NCT06392386

---

Status	RECRUITING
Phase	Phase 2, Phase 3
Sponsor	argenx
Enrollment	12 participants

## Key Eligibility Criteria

---

### Inclusion (5)

- The participant (and/or their legally authorized representative) understands the requirements of the study and is capable of providing written informed consent/assent and complying with protocol requirements
- The participant is aged 2 to <18 years at the time of informed consent/assent
- The participant has been diagnosed with generalised Myasthenia Gravis that is supported by a physical examination and confirmed seropositivity for anti-acetylcholine receptor antibodies
- The participant has had an unsatisfactory response to immunosuppressants, corticosteroids, or acetylcholinesterase inhibitors but is on stable concomitant MG therapy. If receiving corticosteroids and/or immunosuppressants, must be on a stable dose for e1 month before screening
- The participant agrees to use birth control consistent with local regulations and people of child-bearing potential must have a negative blood pregnancy test at screening and a negative urine pregnancy test before receiving the study drug

### Exclusion (16)

- Is a female adolescent of child-bearing potential who is pregnant and/or lactating or intends to become pregnant during their participation in the study
- Has worsening muscle weakness secondary to a concurrent infection or as a result of a medication
- Has a documented lack of clinical response to plasma exchange (PLEX)
- Received a live or live-attenuated vaccine within <4 weeks before screening
- Received a thymectomy within 3 months before screening or is planning to get a thymectomy during their participation in the study
