

Remotely Supervised tDCS+ for Complex Attention in mTBI (Cognetric)

NCT06413173

Status	RECRUITING
Phase	Not Applicable
Sponsor	United States Naval Medical Center, San Diego
Enrollment	160 participants

Key Eligibility Criteria

Inclusion (7)

- Active-Duty Service Members.
- Ages 18 to 60.
- All genders.
- All racial and ethnic groups.
- History of mild TBI (as defined by the DOD/VA criteria used in conjunction with the OSU TBI-ID) sustained at least 3 months and no more than 10 years prior to enrollment.
- ... and 2 more (see full listing online)

Exclusion (9)

- Presence of a medical, psychiatric, physical or non-physical disease, disorder, condition, injury, disability or pre-existent history such that study participation, in the opinion of the PI: (a) may pose a significant risk to the participant; (b) raises the possibility that the participant is unlikely to successfully complete all of the requirements of the study according to the study protocol; or (c) might adversely impact the integrity of the data or the validity of the study results. Specific conditions include (but are not limited to) a history of: brain tumor, epilepsy, cerebral vascular accident (CVA), Schizophrenia, Bipolar Disorder, and Mania.
- History of prior treatment with ECT or neuromodulation in the last 12 months.
- Current, diagnosed substance dependence.
- Newly prescribed medication within the previous 3 weeks.
- Diagnosis of intellectual disability or pervasive developmental disorder (i.e., premorbid IQ less than or equal to 70).
- ... and 4 more (see full listing online)
