

Retinal Vessel Leakage in Cerebral Small Vessel Disease

NCT06416371

Status RECRUITING
Sponsor University of Edinburgh
Enrollment 40 participants

Key Eligibility Criteria

Inclusion (4)

- Membership in the Mild Stroke Study 3 cohort
- Contrast enhanced MRI within 12 months
- Clear optical media in both eyes, as assessed by study investigator
- Best corrected visual acuity (near vision) eN36

Exclusion (10)

- Any condition known to cause retinal leakage (i.e., worse than background diabetic retinopathy, retinal vein occlusion, active uveitis, wet age-related macular degeneration, malignant hypertension)
- Previous treatment for retinal leakage (retinal laser, intravitreal anti-VEGF)
- Recent eye surgery
- Shallow anterior chambers as assessed by torch test
- Pregnancy, renal failure
- ... and 5 more (see full listing online)
