

Safety for Home Administration of Microdose Psilocybin Use

NCT06450210

Status	RECRUITING
Phase	Phase 1
Sponsor	Johns Hopkins University
Enrollment	20 participants

Key Eligibility Criteria

Inclusion (9)

- to 60 years old
- Have given written informed consent
- Have at least a high-school level of education or equivalent (e.g. GED) and be fluent in English
- Be healthy and psychologically stable as determined by screening for medical and psychiatric problems via a personal interview, a medical questionnaire, a physical examination, an electrocardiogram (ECG), and routine medical blood and urinalysis laboratory tests
- Agree to refrain from using any psychoactive drugs, including alcoholic beverages and nicotine, within 24 hours of each drug administration. The exception is caffeine.

... and 4 more (see full listing online)

Exclusion (13)

- Women who are pregnant (as indicated by a positive urine pregnancy test assessed at intake and before each drug session) or nursing; women who are of child-bearing potential and sexually active who are not practicing an effective means of birth control.
- Cardiovascular conditions: coronary artery disease, stroke, angina, uncontrolled hypertension, a clinically significant ECG abnormality (e.g. atrial fibrillation, corrected QT interval (QTc) $>$ 450 msec), artificial heart valve, or transient ischemic attack (TIA) in the past year
- Epilepsy
- Insulin-dependent diabetes; if taking oral hypoglycemic agent, then no history of hypoglycemia
- Currently taking psychoactive drugs (prescribed or not) on a daily basis. This includes nicotine but excepts caffeine.

... and 8 more (see full listing online)
