

Use of a Physiotherapy Assessment to Predict Extubation Failure in Mechanically Ventilated Patients: the EPIC Assessment

NCT06450678

Status RECRUITING
Sponsor Assistance Publique - Hôpitaux de Paris
Enrollment 330 participants

Key Eligibility Criteria

Inclusion (3)

- Patient 18 years of age or older
- Admitted to intensive care and placed on invasive mechanical ventilation for more than 48 hours
- Having passed a T-Tube spontaneous ventilation test \leq 24h

Exclusion (7)

- Tracheostomized patient
- Severe psychiatric pathology or cognitive disorders
- Uncooperative patient
- Patient under therapeutic restriction (terminal extubation)
- Patient who has already participated in research

... and 2 more (see full listing online)

Locations (1 total)

Bichat - Claude Bernard Hospital, Paris, France
