

Developing a Smartphone Application to Support Veteran Opioid Use Disorder Treatment

NCT06454903

Status	RECRUITING
Phase	Not Applicable
Sponsor	VA Office of Research and Development
Enrollment	75 participants

Key Eligibility Criteria

Inclusion (6)

- For the Phase 3, Stage 1b RCT we will be recruiting Veterans enrolled within the VA CT Healthcare System with:
 - Current diagnosis of Opioid Use Disorder (OUD) indicated by either DSM-5-TR or ICD-9 or -10 codes
 - Active Medication treatment for OUD prescription for buprenorphine or methadone (in any formulation)
 - A working smartphone with wireless capabilities (to allow for download of ACT to RECOVER) or is willing to use a study-provided smartphone
 - Competency to provide written informed consent
- ... and 1 more (see full listing online)

Exclusion (5)

- Participants may not:
- Have been on MOUD, in their current treatment episode (i.e., since their most recent induction), for longer than 12 consecutive months prior to their baseline visit
- Have untreated major psychiatric disorders (e.g., bipolar disorders, psychotic disorders)
- Be expressing current, active suicidal/homicidal ideation (i.e., current intent to harm themselves or someone else)
- Have any cognitive/medical impairment precluding study participation or use of smartphones/smartphone applications.
