

BMT-CARE: Psychosocial Intervention for Transplant Caregivers

NCT06472089

Status	RECRUITING
Phase	Not Applicable
Sponsor	Massachusetts General Hospital
Enrollment	800 participants

Key Eligibility Criteria

Inclusion (5)

- Adult caregivers (e18 years) relative or friend of a patient identified as living with them or having in-person contact with them at least twice a week.
- Caregiver of a patient receiving allogeneic or autologous HCT for the treatment of cancer.
- Ability to read and respond to survey questions in English, Spanish or with minimal assistance from an interpreter.
- Adult patients (e18 years) with a hematologic malignancy and planned admission for autologous or allogeneic HCT.
- Ability to respond to questions in English, Spanish, or with minimal assistance from an interpreter.

Exclusion (3)

- Caregivers of patients undergoing HCT for a benign hematologic condition or undergoing outpatient HCT.
- Caregivers with a major untreated psychiatric or cognitive condition which the treating oncology clinicians believes interferes with the capacity to provide informed consent.
- Caregivers of patients who have already undergone HCT within the past 5 years
