

Cardioneuroablation: Fragmented Atrial Potentials, Intracardiac Echocardiography and Computed Tomography

NCT06472102

Status	RECRUITING
Phase	Not Applicable
Sponsor	Centre of Postgraduate Medical Education
Enrollment	100 participants

Key Eligibility Criteria

Inclusion (3)

- severe, recurrent symptoms due to reflex syncope with ECG documented asystole ≥ 3 seconds, especially if associated with injury, or recurrent presyncope with persistent reflex bradycardia
- history of ineffective prior non-pharmacological treatment and positive baseline atropine test (sinus rate acceleration $\geq 30\%$ and no AV block following 2 mg of intravenous atropine) -
- informed written consent obtained

Exclusion (3)

- contraindications to perform cardioneuroablation
- contraindications to perform computed tomography with intravenous contrast injection
- lack of informed written consent obtained
