

The Use of Body Surface Gastric Mapping in Assessing the Clinical Success of G-POEM

NCT06493032

Status	RECRUITING
Phase	Not Applicable
Sponsor	Indiana University
Enrollment	20 participants

Key Eligibility Criteria

Inclusion (1)

- Patients clinically eligible for G-Poem at our center.

Exclusion (4)

- Pregnant or breast-feeding
- Patients with gastroparesis due to spinal cord injuries due to difficulties in conducting the BSGM. Of note, we rarely see gastroparesis in this context.
- Inability to perform BSGM: history of severe skin allergies or sensitivity to cosmetics or lotions; chronically damaged or vulnerable epigastric skin (fragile skin, wounds, inflammation); patients unable to remain in a relaxed reclined position for the test duration.
- Patients with abdominal drains or tubes
