

Comparison of Different Methods to Calculate Pendelluft by Electrical Impedance Tomography in Mechanically Ventilated Patients

NCT06494215

Status	RECRUITING
Phase	Not Applicable
Sponsor	University of Sao Paulo General Hospital
Enrollment	15 participants

Key Eligibility Criteria

Inclusion (1)

- Patients under invasive mechanical ventilation intubated due to respiratory failure in pressure support mode (weaning phase)

Exclusion (1)

- Age less than 18 years; sedation or neuromuscular blockade; absence of respiratory effort; contraindications to esophageal balloon catheter positioning or electrical impedance tomography belt positioning; presence of pneumothorax or active air leaks; hemodynamic instability; absence of informed consent.

Locations (1 total)

Instituto do Coração do Hospital das Clínicas da Faculdade de Medicina da USP, São Paulo, Brazil
