

Parathyroid Allograft for Severe Refractory Hypoparathyroidism

NCT06499246

Status	RECRUITING
Phase	Not Applicable
Sponsor	Karen Devon
Enrollment	5 participants

Key Eligibility Criteria

Inclusion (5)

- Prior total thyroidectomy
- Symptomatic hypocalcemia (numbness, tingling, or other neurologic symptoms) requiring daily high dose calcium (greater than 2000 mg per day) and vitamin D (greater than 2 mcg of calcitriol per day) supplementation and/or intermittent IV calcium infusion.
- Biochemical blood test consistent with hypoparathyroidism
- Failed medical management (>1 year of post-thyroidectomy hypoparathyroidism treated medically with persistent biochemical disease and symptoms)
- Patient meets current standards for receiving an organ transplant (e.g. no active infection, no malignancy, no contraindications to immunosuppression or surgery)

Exclusion (7)

- <18 years old male or female
 - Current pregnancy
 - Advanced stage 3-4 thyroid cancer
 - Contraindication to surgery or immunosuppression
 - Malignancy with contraindication to transplant:
- ... and 2 more (see full listing online)
