

# Effect of PCI on Clinical Prognosis of Chronic Coronary Artery Occlusion

NCT06542653

---

Status	RECRUITING
Sponsor	The First Affiliated Hospital with Nanjing Medical University
Enrollment	258 participants

## Key Eligibility Criteria

---

### Inclusion (1)

- patients with at least one coronary CTO lesion at our hospital in between January 2011 and December 2017

### Exclusion (4)

- (1) patients with ST-segment elevation myocardial infarction (STEMI)
- (2) a history of coronary artery bypass grafting (CABG)
- (3) cardiogenic shock
- (4) malignant tumor. Patients were referred for PCI based on CTO-related symptoms or evidence of viability, or corresponding ischemia in the area of the CTO artery.

## Locations (1 total)
