

Pilot Randomized Controlled Trial of a Collaborative Agenda-setting Intervention (CASI) for Patients With Ovarian Cancer

NCT06543537

Status	RECRUITING
Phase	Not Applicable
Sponsor	Dana-Farber Cancer Institute
Enrollment	112 participants

Plain Language Summary

This study is testing a communication tool called CASI (Collaborative Agenda-setting Intervention) to help patients with advanced ovarian cancer and their care teams have better, more structured conversations during chemotherapy visits.

****You may be eligible if...****

- You are 18 or older with advanced ovarian cancer (stage III, stage IV, or recurrent)
- You are currently undergoing chemotherapy
- You can communicate in English
- You are willing to be audio recorded
- Caregivers (family, partners, or close friends) may also be eligible to participate alongside the patient

****You may NOT be eligible if...****

- You cannot communicate in English
- You are not receiving care from a participating medical team at the study site

Talk to your doctor to see if this trial is right for you.
