

Human Amniotic Membrane On Venous Leg Ulcers In an Elderly Population

NCT06544564

Status	RECRUITING
Phase	Not Applicable
Sponsor	BioLab Holdings
Enrollment	150 participants

Key Eligibility Criteria

Inclusion (20)

- In order to be eligible to participate in this study, subjects must meet all of the following criteria:
 - Ulcers of venous origin, as determined by clinical signs and symptoms (e.g. hyperpigmentation of the surrounding skin, history of swelling, varicosities, lipodermatosclerosis and/or dermatitis) or other assessments (e.g. venous reflux test). If the subject has multiple on the same leg and/or bilateral ulcers, the largest should be selected.
 - Venous insufficiency ulcers, of at least 1-month duration, which have not adequately responded to conventional ulcer therapy
 - Venous insufficiency ulcers between 2 cm² and 16 cm²
 - Venous ulcer has not reduced in area e40% from baseline measurements during the 2-week screening period
- ... and 15 more (see full listing online)
