

Efficacy of Ultraviolet Germicidal Irradiation Devices to Reduce Respiratory Infections in Nursing Homes: Cluster Randomized Crossover Trial

NCT06569160

Status	RECRUITING
Phase	Not Applicable
Sponsor	Centre Hospitalier Emile Roux
Enrollment	1,200 participants

Key Eligibility Criteria

Inclusion (7)

- Elderly Nursing homes (ENH):
- Having a system for monitoring cases of upper and lower respiratory infections among their residents.
- Agreeing to take part in the study
- Undertaking to comply with the protocol
- Accepting the installation of UVGI devices
- ... and 2 more (see full listing online)

Exclusion (4)

- ENH:
- Not wishing to be equipped with UVGI devices in all rooms considered necessary to be equipped by the investigators
- Having planned a major change to the structure (extension, renovation, closure, requalification, etc.) during the course of the study, which could affect the study population and/or UVGI air treatment devices.
- Residents of the ENH included in the study who have expressed (personally or through a relative or legal representative) the wish that their personal data not be used for the study will not be included in the study.
