

Advancing VR-based Attentional Bias as a Biomarker for Tobacco Use Disorder

NCT06582888

Status	RECRUITING
Phase	Early Phase 1
Sponsor	University of California, San Diego
Enrollment	200 participants

Key Eligibility Criteria

Inclusion (9)

- In order to be eligible to participate in this study, an individual must meet all of the following criteria:
- Provision of signed and dated informed consent form
- Stated willingness to comply with all study procedures and availability for the duration of the study
- Persons, aged 22+
- Ability to take oral medication and be willing to adhere to the dosing regimen

... and 4 more (see full listing online)

Exclusion (6)

- Contraindications/conditions with special precautions for varenicline treatment (i.e., history of serious hypersensitivity or skin reactions to varenicline, history of severe renal impairment, seizures, severe cardiovascular disease, chronic or severe nausea, Stevens-Johnson syndrome, erythema multiforme, pregnancy or nursing)
- Medical or psychiatric history affecting brain development (i.e., history and/or treatment of neurologic disorders, severe head trauma with loss of consciousness ≥ 2 minutes, or current severe Diagnostic and Statistical Manual 5th edition (DSM-5) psychiatric disorders other than tobacco use disorders)
- Current suicidal ideation or history of suicide attempt or self-mutilatory acts in the past 12 months
- Other recreational drug use in the past 30 days (besides alcohol and cannabis) verified by oral and urine fluid toxicology
- Visual/vestibular problems that may make task completion difficult (i.e., motion sickness, difficulty balancing, blindness)

... and 1 more (see full listing online)
