

Improving Needs Among Older Adults

NCT06588556

Status	RECRUITING
Phase	Not Applicable
Sponsor	Duke University
Enrollment	350 participants

Key Eligibility Criteria

Inclusion (11)

- Patients (who are not interviewed but whose characteristics prompt enrollment of family members)
 - Adult aged e18 years
 - Managed in an adult medical, cardiac, trauma, surgical, or neurological ICU
 - Serious acute illness associated with a need for invasive mechanical ventilation
 - ICU team expect patient to require mechanical ventilation for 2 or more days
- ... and 6 more (see full listing online)

Exclusion (15)

- Patients
 - Death or full comfort care plan expected within 24 hours by ICU attending or fellow physician Rationale: measurable intervention effect unlikely
 - Palliative care consultative team and/or palliative care specialists are currently involved in the patient's care.
 - Rationale: this would dilute the intervention's effect.
 - ICU length of stay >4 days during current ICU admission. Rationale: this would dilute intervention effect by widening the timeframe of family-clinician interactions and limiting standardization.
- ... and 10 more (see full listing online)
