

Establishment of Multiparametric Prediction Models for Moderate to Severe Thyroid Associated Ophthalmopathy

NCT06590220

Status RECRUITING
Sponsor Shanghai Changzheng Hospital
Enrollment 150 participants

Key Eligibility Criteria

Inclusion (3)

- According to the Bartley criteria diagnosed TAO at our hospital after 2024/8/31
- Moderate to severe patients defined by EUGOGO
- CAS e3 (on the 7-item scale) for the study eye

Exclusion (7)

- Anticipated need for intervention due to sight-threatening complications or other significant and acute deterioration in vision
- History of systemic (eg, oral or IV) steroid use with a cumulative dose equivalent to ≥ 1 g of methylprednisolone for the treatment of TAO.
- Any major illness/condition or evidence of an unstable clinical condition that, in the investigator's judgment, will substantially increase the risk to the participant, or confound the interpretation of safety assessments, if they were to participate in the study
- Any other condition that, in the opinion of the investigator, would impair the ability of the participant to comply with the study procedures or impair the ability to interpret data from the participant's participation in the study
- Pregnant or lactating
- ... and 2 more (see full listing online)
