

# Remote Cardiovascular Monitoring in Post-TAVI Patients

NCT06602609

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Not Applicable
<b>Sponsor</b>	Imperial College London
<b>Enrollment</b>	216 participants

## Key Eligibility Criteria

---

### Inclusion (10)

- Patient age must be 18 years or above.
- Post-TAVI patients without serious complications hindering same-day discharge, including vascular, neurological, and cardiac postprocedural complications necessitating inpatient care:
- Vascular: Controlled with adequate vascular hemostasis.
- Neurological: Conscious and oriented, not under the effect of residual sedation.
- Cardiac: No significant pericardial effusion.

... and 5 more (see full listing online)

### Exclusion (6)

- Hemodynamically unstable post-TAVI condition, periprocedural cardiac arrest, cerebral vascular accident, acute kidney injury (AKI) and major/life-threatening bleeding requiring blood transfusion.
- Patients with a permanent (pre-existing or new) implanted pacing device.
- Procedural failure in device delivery.
- Major vascular access complications require patients to stay.
- Inability to engage with the technology.

... and 1 more (see full listing online)

## Locations (1 total)
