

Somatic Dysfunction in Patients With Acute Cerebrovascular Disease

NCT06605014

Status RECRUITING
Sponsor University of California, Davis
Enrollment 120 participants

Key Eligibility Criteria

Inclusion (7)

- adults e18 years
- Admission diagnosis:
- ischemic stroke OR
- transient ischemic attack (TIA). A prior history of TIA but without stroke may be enrolled.
- Neurologic stability or lack of significant deterioration (i.e. NIHSS<4) for at least 24 hours (defined by clinical documentation and/or communication with provider team(s)) in stroke subjects

... and 2 more (see full listing online)

Exclusion (10)

- Acute skeletal fracture or known dislocation; history of pathologic (osteoporotic or neoplastic) skeletal fracture of thoracic cage, hip/pelvis/sacrum, or vertebral column
- Prior history of ICH, ischemic stroke, confirmed by imaging and/or clinical evaluation. Patients with imaging showing "chronic stroke" who have never received a diagnosis of stroke and/or have not been previously symptomatic may still be enrolled, based on the Investigator's clinical judgement.
- Spinal column support brace (e.g. cervical collar)
- Anticipated neurosurgical intervention during hospitalization: decompressive hemicraniectomy, hematoma evacuation (defined by clinical documentation and/or communication with provider team(s))
- Current endotracheal intubation (*note: extubated patients can be evaluated for eligibility)

... and 5 more (see full listing online)
