| <b>Enrollment</b> | 6,000 participants                          |

## Plain Language Summary

---

This study is collecting medical data and tissue samples from melanoma patients to better understand how the disease develops and responds to treatment. The focus is on large or giant congenital melanocytic nevi (large dark birthmarks present from birth) and melanoma. Researchers want to build a foundation for more personalized treatments.

**\*\*You may be eligible if...\*\***

- You have a confirmed melanoma diagnosis (any age)
- You are willing to participate and sign a consent form

**\*\*You may NOT be eligible if...\*\***

- You have not been diagnosed with melanoma
- You have not signed the informed consent
- Your medical records are from before 2012

Talk to your doctor to see if this trial is right for you.

## Key Eligibility Criteria

---

### Inclusion (1)

- Melanoma patients of any age with histopathological confirmed melanoma

### Exclusion (3)

- Not having a melanoma diagnosis
- Not having signed the informed consent
- Records prior to the year 2012 (as data might not accurately reflect current practices and treatment outcomes)

## Locations (1 total)

---

Hospital Clínic de Barcelona (Dermatology service), Barcelona, Catalonia, Spain
