

Determinants of Bone Dimensional Changes After Extraction and Alveolar Ridge Preservation

NCT06624982

Status RECRUITING
Sponsor Marquette University
Enrollment 160 participants

Key Eligibility Criteria

Inclusion (6)

- Adult patients (18-75 years)
- Good general health (controlled conditions)
- Controlled periodontal disease
- Scheduled for single tooth extraction with bone graft placement and resorbable membrane
- Tooth to be extracted must have adjacent teeth
- ... and 1 more (see full listing online)

Exclusion (5)

- Smoking
- Pregnancy
- Active periodontal disease
- Systemic conditions that affect healing
- Lack of socket wall integrity (bone loss $\geq 50\%$) prior to extraction, teeth with severe infection requiring pre-extraction antibiotic treatment to control infection), and contraindications for tooth extraction.
