

# Desmopressin Stimulation Test Performance in ACTH-Dependent Cushing Syndrome

NCT06635629

---

|            |  |
|------------|--|
| Status     | RECRUITING   |
| Phase      | Phase 2  |
| Sponsor    | National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) |
| Enrollment | 140 participants   |

## Key Eligibility Criteria

---

### Inclusion (15)

- To be eligible to participate in this study, an individual must meet all of the following criteria:
- Aged 18-70 years
- Agreement to adhere to Lifestyle Considerations throughout the study.
- Evidence of acceptable laboratory testing results within four weeks of the first test day, as shown by medical record review:
- Hematocrit at entry  $\geq 33\%$

... and 10 more (see full listing online)

### Exclusion (30)

- An individual who meets any of the following criteria will be excluded from participation in this study, based on medical record review (possible Cushing syndrome patients) or a screening visit (healthy volunteers).
- Inability to comply with all study procedures and visits
- Inability of subject to understand or to sign a written informed consent document.
- Known allergy/hypersensitivity to desmopressin.
- Pregnancy or lactation, due to alterations in measured serum cortisol and lack of data on desmopressin safety.

... and 25 more (see full listing online)
