

Development of a Non-invasive Method for Quantifying Cerebral Glucose Metabolism for Studying the Effect of Glucagon in Humans

NCT06647368

Status	RECRUITING
Phase	Not Applicable
Sponsor	Nicolai Jacob Wewer Albrechtsen
Enrollment	6 participants

Key Eligibility Criteria

Inclusion (3)

- Capable of understanding the participant information and signing the consent form
- Between 25 and 70 years of age
- Body mass index $\leq 25 \text{ kg/m}^2$

Exclusion (14)

- Enrolment in other research project that might interfere with the study
- Diabetes diagnosis
- Pregnancy or breastfeeding
- Use of medications which, in the opinion of the investigator, may jeopardise participant's safety or compliance with the protocol
- Diagnosis of psychiatric disorders, dementias, or any other neurological disorders that in the opinion of the investigator precludes compliance with the study protocol, evaluation of the results or represents an unacceptable risk for the participants safety
- ... and 9 more (see full listing online)
