

Physician Modified Endovascular Grafts for the Treatment of Juxtarenal Aortic Aneurysms

NCT06657794

Status	RECRUITING
Phase	Not Applicable
Sponsor	The Cleveland Clinic
Enrollment	15 participants

Key Eligibility Criteria

Inclusion (17)

- Patient is e 18 years of age
 - Patients who are male or non-pregnant female (females of child bearing potential must have a negative pregnancy test prior to enrollment into the study)
 - Patient or Legally Authorized Representative has signed an Institutional Review Board (IRB) approved Informed Consent Form
 - Patient has a juxtarenal abdominal aortic aneurysm that meets at least one of the following:
 - An aneurysm with a maximum diameter of e 5.5 cm for male (e 5.0 cm for female) or 2 times the normal diameter just proximal to the aneurysm using orthogonal (i.e., perpendicular to the centerline) measurements
- ... and 12 more (see full listing online)

Exclusion (15)

- Patients that meet ANY of the following are not eligible for enrollment into the study:
 - Patient has a mycotic aneurysm or has an active systemic or local infection that may increase the risk of endovascular infection
 - Patient has unstable angina (defined as angina with a progressive increase in symptoms, new onset at rest or nocturnal angina, or onset of prolonged angina)
 - Patient has a major surgical or interventional procedure, not related to the endovascular repair, planned within +/- 30 days of the AAA repair.
 - Patient has history of an aortopathic connective tissue disease (e.g. Marfan's or Ehler's-Danlos syndrome).
- ... and 10 more (see full listing online)
