

Fremanezumab for the Prevention of Menstrually-related Migraine Attacks

NCT06659120

Status	RECRUITING
Sponsor	Insel Gruppe AG, University Hospital Bern
Enrollment	120 participants

Key Eligibility Criteria

Inclusion (8)

- Premenopausal women of 18 years of age or older.
- Women with a regular cycle 21-32 days.
- The patient has a diagnosis of chronic or episodic migraine.
- Women suffering from migraine with or without aura according to International Headache Society (IHS) Classification (ICHD-3 code A1.1.2 or A1.2.0.2) for at least one year.
- The patient has been maintaining a daily headache diary as part of her routine disease management per her treating physician and has 3 months headache diary data prior to baseline/ treatment initiation. Notes: The patient's headache diary captures information on each headache day, headache duration, headache severity, medication intake, each day of menstrual bleeding, pain intensity of symptoms associated with the menstrual bleeding and symptoms of endometriosis (if present): dysmenorrhoea, dyschezia, dyspareunia, dysuria.

... and 3 more (see full listing online)

Exclusion (7)

- Patients with pure menstrual migraine.
