

# Observational Study to Observe Variations of Gait Parameters in Patients With Neuromuscular Diseases

NCT06666816

---

**Status** RECRUITING  
**Sponsor** IRCCS Eugenio Medea  
**Enrollment** 120 participants

## Key Eligibility Criteria

---

### Inclusion (2)

- Ambulant adult patients with genetic diagnosis of muscular dystrophy/myopathy (dystrophinopathies, muscular dystrophies and congenital and non-congenital myopathies), of spinal muscular atrophy (SMA) and with molecular diagnosis of Charcot-Marie Tooth 1 or 2.
- independent walking, even with assistance;

### Exclusion (2)

- Dilated or ischemic heart disease with moderate impairment;
- Chronic respiratory failure: forced vital capacity (FVC)  $\lt$  40%; more than 5% of nocturnal time spent with peripheral oxygen saturation levels  $\lt$  90.

## Locations (2 total)
