

Characterization of Human Immune Signatures to Zoonotic Virus Exposure in Cambodia

NCT06680843

Status RECRUITING
Sponsor National Institute of Allergy and Infectious Diseases (NIAID)
Enrollment 400 participants

Key Eligibility Criteria

Inclusion (9)

- Capacity to provide informed consent.
- Adult aged 18-65 years.
- Have interaction with suspected infected animals within the last 2 years, including (but not limited to) the following risk factors:
- Hunting, slaughtering, or consuming suspected infected animals;
- Fruit collection, date palm sap harvesting, or tree pruning within agricultural plantations containing bat roosts;
- ... and 4 more (see full listing online)

Exclusion (6)

- Pregnancy (based on self-reporting).
- Any underlying, chronic, or current medical condition that, in the opinion of the investigator, would interfere with participation in the study (e.g., inability or great difficulty in drawing blood, known anemia).
- Self-reported symptoms suggestive of acute infection (acute myalgias, arthralgias, headache, retro-orbital pain, dyspnea, rash) within 7 days prior to enrollment.
- Signs suggestive of acute infection (fever, defined as internal temperature $\geq 38^{\circ}\text{C}$; hypoxemia, defined as peripheral oxygen saturation of $\leq 90\%$; hypotension, defined as systolic blood pressure ≤ 90 mm Hg or diastolic blood pressure ≤ 50 mm Hg) present at screening.
- Self-reported diagnosis of immune deficiency, including HIV infection, chronic corticosteroid use (≥ 10 mg prednisone dose or its equivalent for a continuous period of ≥ 30 days within the last 1 year), ongoing or prior (within the last 10 years) receipt of chemotherapy or immunotherapy, or current hematological malignancy.
- ... and 1 more (see full listing online)

Locations (5 total)

Communicable Disease Control Department, Battambang, Cambodia
Communicable Disease Control Department, Kampong Thom, Cambodia
Communicable Disease Control Department, Kampot, Cambodia
... and 2 more locations
