

PeptiCol EZgraft in the Extraction Socket Preservation Process After Tooth Extraction

NCT06783660

Status	RECRUITING
Phase	Not Applicable
Sponsor	NIBEC Co., Ltd.
Enrollment	114 participants

Key Eligibility Criteria

Inclusion (7)

- Adults aged 19 to 75 years.
- Systemically healthy or with mild systemic disease, classified as ASA I or II.
- Planning to place implants in the maxilla or mandible after extraction, or having such plans for the future. If there are multiple extraction sockets, only one socket will be included in the trial, and other areas will follow spontaneous healing or treatment plans.
- The extraction socket area must have more than 50% of the alveolar bone wall remaining.
- Willing to maintain good oral hygiene during the clinical trial.

... and 2 more (see full listing online)

Exclusion (18)

- Extensive alveolar bone absorption observed in the extraction socket area.
- Severe periodontal disease or acute periodontal abscess.
- Poor oral hygiene.
- History of bone grafts or implants in the area of the medical device application.
- Mucosal diseases due to autoimmune disorders.

... and 13 more (see full listing online)
