

AI-based Physiotherapy for Oral Cancer Patients

NCT06785051

Status	RECRUITING
Phase	Not Applicable
Sponsor	National Taiwan University Hospital
Enrollment	100 participants

Plain Language Summary

This study is testing an AI-powered physiotherapy program for people with oral cancer who are undergoing surgery, radiation, or chemotherapy. The AI system guides patients through exercises to maintain physical function and quality of life during and after treatment.

****You may be eligible if...****

- You have been newly diagnosed with oral cancer
- You are scheduled to receive treatment (surgery, radiation, chemotherapy, or a combination)
- You are between 20 and 65 years old

****You may NOT be eligible if...****

- You are unable to communicate (verbally or otherwise)
- You have a physical or neurological condition that significantly affects your ability to move or exercise

Talk to your doctor to see if this trial is right for you.

Key Eligibility Criteria

Inclusion (2)

- Newly diagnosed oral cancer patients who are scheduled to receive cancer-related treatments (e.g., oral cancer surgery, radiotherapy, chemotherapy, or chemoradiotherapy).
- Age between 20 and 65 years.

Exclusion (2)

- Could not communicate.
- Had any disorder that could influence movement performance.

Locations (2 total)
