

Intermittent Visual Perturbations to Enhance Balance Training

NCT06804512

Status	RECRUITING
Phase	Early Phase 1
Sponsor	University of Florida
Enrollment	540 participants

Key Eligibility Criteria

Inclusion (3)

- Ages 18-30 years, or 65-89 years.
- Ability to walk independently for 10 minutes continuously.
- Willingness to be randomized to any experimental group and to participate in all aspects of study assessment and intervention

Exclusion (7)

- Major cognitive disorder that interferes with independence, based on affirmative response (always/usually/sometimes) to the following question: "As a result of confusion or memory loss, how often do you need assistance with day-to-day activities such as cooking, cleaning, taking medications, driving, or paying bills? Would you say it is 1) Always; 2) Usually; 3) Sometimes; 4) Rarely; or 5) Never".
- Current or recent (within 6 months) lower limb musculoskeletal injury that causes pain during walking or limits walking ability.
- History of neurological injury or disability (including spinal cord injury, stroke, Parkinson's disease, or multiple sclerosis).
- Difficulty communicating with study personnel.
- Current enrollment in any other clinical trial.
- ... and 2 more (see full listing online)
