

# The Frequency of Peripheral Arterial Disease in Patients with Deep Vein Thrombosis of the Lower Limbs

NCT06806540

---

**Status** RECRUITING  
**Sponsor** IRCCS Azienda Ospedaliero-Universitaria di Bologna  
**Enrollment** 440 participants

## Key Eligibility Criteria

---

### Inclusion (4)

- Age  $\geq$  18 years
- Diagnosis of unprovoked, provoked, or cancer-related DVT
- Diagnosis of DVT in the lower limbs, both proximal and distal, subjected to compression ultrasound within 6 months of diagnosis
- Ability to provide informed consent

### Exclusion (4)

- Diagnosis of upper limb DVT or DVT in other locations, if not concurrent with lower limb DVT
- Diagnosis of superficial venous thrombosis (SVT), if not concurrent with lower limb DVT
- Diagnosis of DVT associated with central venous catheters (CVC)
- Presence of epithelial or basal cell carcinomas, as they are associated with a low risk of deep vein thrombosis

## Locations (1 total)
