

Comparing Advanced Hemostasis and Ultrasound-Guided Puncture to Conventional Approaches in Distal Radial Access

NCT06835829

Status	RECRUITING
Phase	Not Applicable
Sponsor	Associazione per lo Studio delle Malattie Cardiovascolari Cardiva ONLUS
Enrollment	480 participants

Key Eligibility Criteria

Inclusion (7)

- Age ≥18 years.
- Patients presenting with CCS or ACS, including unstable angina or NSTEMI.
- Patients planned for coronary angiography or PCI.
- Patients able to provide written informed consent.
- Patient is willing to comply with all study protocol required evaluations.

... and 2 more (see full listing online)

Exclusion (6)

- Acute ST-segment elevation myocardial infarction.
- Cardiogenic shock.
- Chronic hemodialysis.
- Contraindications to radial access, such as occlusive upper arm peripheral artery disease, or known anatomic variants prohibiting TRA on both sides.
- Medical conditions that may cause non-compliance with the study protocol and/or may confound the data interpretation.

... and 1 more (see full listing online)
