

# Impact of Anesthesia, Positive Pressure Ventilation and Modality of Imaging on the Echocardiographic Assessment of the Severity of Aortic Regurgitation

NCT06835946

---

**Status** RECRUITING  
**Sponsor** University of Liege  
**Enrollment** 100 participants

## Key Eligibility Criteria

---

### Inclusion (2)

- Known aortic regurgitation of any grade
- Scheduled for a cardiac surgery procedure during which a trans-esophageal echo is planned.

### Exclusion (5)

- Non sinus rhythm
- Mitral regurgitation more than mild.
- Pre-operative critical state (according to the definition of the EuroSCORE II)
- Presence of a prosthetic aortic valve
- Contra-indication to trans-esophageal echo
