

The MOUD Plus Pilot: Counseling and Peer Support to Support Retention for Medically Complex Patients With Opioid Use Disorder Seen In Primary Care

NCT06837662

Status	RECRUITING
Phase	Not Applicable
Sponsor	Oregon Health and Science University
Enrollment	70 participants

Key Eligibility Criteria

Inclusion (9)

- Patient participants 18 years and older
 - Have an OUD-related diagnosis (e.g. Opioid Use Disorder in remission, Opioid Dependence, Opioid Abuse, Substance Use Disorder - opioids, etc.), or have used fentanyl or heroin over the past 30 days
 - Who meet at least one of the following criteria:
 - Present to primary care at Central City Concern (CCC) within 8 weeks of starting or re-starting a treatment episode (defined as starting MOUD after not having received prescribed MOUD in an outpatient setting for OUD in the prior 30 days).
 - Who present to primary care at CCC and are not seeking treatment with MOUD and have not engaged in counseling services (e.g. harm reduction counseling) in the prior 30 days
- ... and 4 more (see full listing online)

Exclusion (5)

- Patient participants who present for addiction treatment but are ineligible to receive on-going services at Central City (i.e. they have existing primary care at another location, or are currently receiving opioid use disorder treatment at another clinic, such as methadone clinic) may not participate in the study.
- Patient participants who are not able to verbally consent may not participate in the study.
- Patients who do not have addiction to opioids may not participate in the study.
- Patients who participated in Aim 2 would not be eligible for Aim 3
- Patients who lack stable phone access may not participate in the study.

Locations (1 total)
