

Adapting The Fear Of Recurrence Therapy (FORT) for Parents and Establishing Acceptability and Feasibility

NCT06872840

Status	RECRUITING
Phase	Not Applicable
Sponsor	University of Ottawa
Enrollment	36 participants

Key Eligibility Criteria

Inclusion (4)

- Parent (or primary caregiver) caring for a childhood cancer survivor (<18 years of age) of any type of cancer type, who is at least 1 months from the completion of active treatment and has not had a recurrence of their cancer
- A score of 13 or greater on the Fear of Cancer Recurrence Inventory-Short Form-Parent version (FCRI-SF-P; range 0-36), suggesting clinical levels of FCR
- Access to a computer and internet connection
- Living in Canada

Exclusion (6)

- Being the parent of a pediatric cancer survivor who is now 18 years of age or older
 - Being the parent of a pediatric cancer survivor who has undergone hematopoietic cell transplantation and has active chronic or acute graft-versus-host disease which has not stabilized for at least 3 months
 - Non-English speakers
 - Currently participating in another therapist-led psychosocial therapy group
 - Parent with unmanaged/undermanaged mental health disorder judged to be clinically contraindicated and/or likely to affect the group work
- ... and 1 more (see full listing online)
