

A Study to Assess the Concentration of Bimekizumab in Mature Breast Milk From Mothers Receiving Treatment With Bimzelx® (Bimekizumab)

NCT06888193

Status	RECRUITING
Phase	Phase 1
Sponsor	UCB Biopharma SRL
Enrollment	20 participants

Key Eligibility Criteria

Inclusion (6)

- Study participant must be at least 18 years of age at the time of signing the informed consent.
- Study participant is being treated with commercial bimekizumab per locally approved prescribing information and in accordance with her treating physician.
- Study participant is breastfeeding and intends to breastfeed throughout the Sampling Period.
- The decision to treat with bimekizumab and to breastfeed is made independently from and prior to the study participant consenting to participate in the study.
- Study participant must be on bimekizumab treatment for at least 12 weeks after delivery and since starting/restarting/continuing bimekizumab prior to sampling (prior to start of the Sampling Period).

... and 1 more (see full listing online)

Exclusion (7)

- Study participant has any medical, obstetrical, or psychiatric condition that, in the opinion of the Investigator, could jeopardize or would compromise the study participant's ability to participate in this study.
- The infant has any abnormality noted on physical examination or medical history that, in the opinion of the Investigator, may jeopardize or compromise study participation.
- Study participant has a history of chronic alcohol or drug abuse within the previous last year.
- Study participant has history of breast implants, breast augmentation, or breast reduction surgery.
- Study participant plans a surgical intervention during the Screening Period and Sampling Period or anticipates having surgery while participating in the Sampling Period (does not apply to tubal ligation).

... and 2 more (see full listing online)
