

Cortisol and Obesity - A Vicious Cycle? Hypoglycemia After Bariatric Surgery - Association With Cortisol Metabolism?

NCT06896682

Status RECRUITING
Sponsor Esbjerg Hospital - University Hospital of Southern Denmark
Enrollment 100 participants

Key Eligibility Criteria

Inclusion (3)

- Participants must have undergone one of the following bariatric procedures at least 12 months prior:
- Roux-en-Y gastric bypass
- Gastric sleeve

Exclusion (8)

- Pregnancy and breastfeeding
 - Nephrotic syndrome (kidney disease with protein loss in urine), liver cirrhosis, or severe malnutrition, as these conditions reduce cortisol-binding globulin (CBG) levels, affecting total cortisol concentration
 - Use of corticosteroid medications, such as prednisolone
 - Use of opioid-containing medication
 - Use of medications containing estrogen, such as hormone therapy for menopause
- ... and 3 more (see full listing online)
