

Implementation of Naturalistic Developmental Behavioral Intervention (NDBI) Through Coaching Caregivers of Young Autistic Children

NCT06923553

Status	RECRUITING
Phase	Not Applicable
Sponsor	University of Texas at Austin
Enrollment	50 participants

Key Eligibility Criteria

Inclusion (3)

- Caregivers: Primary caregivers of young children aged 0-5 who meet one of the following conditions: (1) diagnosed with autism spectrum disorder, (2) diagnosed with developmental delay, and (3) diagnosed with a developmental disability. Eligible caregivers include: (1) parents, (2) grandparents, (3) legal guardians. All caregivers must be at least 18 years old and must be of Korean descent.
- Clinicians: The clinicians must hold a current Board Certified Behavior Analyst (BCBA) certification and must have experience delivering behavioral intervention and caregiver training for children aged 0-5.
- Children: Children in this study must be between 0-5 years old and must have a formal medical diagnosis confirming one of the following conditions: (1) autism spectrum disorder (ASD), (2) developmental delay, or (3) developmental disability.

Exclusion (3)

- Caregivers: Caregivers will be excluded if they (1) primarily care for children over the age of 6, (2) are not Korean speakers, or (3) are unable to fully participate in study activities, such as watching training videos, recording parent-child interactions, or completing required questionnaires.
- Clinicians: Clinicians will be excluded if they (1) do not hold a valid Board Certified Behavior Analyst (BCBA) certification, (2) lack experience in providing behavioral intervention and caregiver training for children aged 0-5, or (3) only work with children over the age of 6.
- Children: Children will be excluded if they (1) are older than 5 years, (2) do not have a formal medical diagnosis confirming autism spectrum disorder, developmental delay, or developmental disability.
