

Stratifying Critically Ill Patients for Novel Ferroptosis or Pyroptosis Intervention Strategies

NCT06928649

Status	RECRUITING
Phase	Not Applicable
Sponsor	University Hospital, Antwerp
Enrollment	600 participants

Key Eligibility Criteria

Inclusion (3)

- Admitted to the ICU of UZA
- Critically ill and predicted to be hospitalised in the ICU for > 48 hours (i.e. mostly patients admitted for sepsis, trauma, haemorrhagic shock, neurological catastrophe ... which means at risk to develop mono-or multiple organ failure)
- With arterial line in place (for blood sampling)

Exclusion (2)

- Refusal of consent by patient or closest relative
- Postoperative patients after major surgery in whom prolonged ICU stay is not foreseen (i.e. elective cardiac surgery)

Locations (1 total)

University Hospital Antwerp, Edegem, Belgium
