

Biomarker Role in Assessing Imaging Needs for Mild Cranial Trauma

NCT06932588

Status	RECRUITING
Phase	Not Applicable
Sponsor	Emory University
Enrollment	350 participants

Key Eligibility Criteria

Inclusion (4)

- Adults aged 18 years and older
- Mild TBI, defined as Glasgow Coma Scale (GCS) score 13-15, presenting within 24 hours of injury
- No prior head imaging for the same incident
- Presenting within 24 hours of onset of injury

Exclusion (5)

- Patients with penetrating head injury
- History of known brain abnormality including tumor, cerebrovascular malformation, recent brain surgery (within 6 months), prior head injury (within 6 months)
- Need for emergent surgical intervention for brain or alternate body organ injury
- Need for emergent bedside procedures for hemodynamic or orthopedic stabilization
- Patients deemed at higher risk for decline by the provider prohibit the 15-minute delay in obtaining imaging needed for biomarker testing.
