

Glycine and Magnesium+Thiamine for the Treatment of Primary Ciliary Dyskinesia

NCT06959251

Status	RECRUITING
Phase	Not Applicable
Sponsor	Instituto Nacional de Enfermedades Respiratorias
Enrollment	60 participants

Key Eligibility Criteria

Inclusion (7)

- Any sex.
- Age of 5 years or more.
- Diagnosis of primary ciliary dyskinesia (PCD) established according to international recommendations (Shapiro et al. Am J Respir Crit Care Med 2018;197(12):e24-e39, and Shapiro et al. Ped Pulmonol 2016;51:115-132).
- Without respiratory exacerbations of PCD in the previous 30 days.
- Without acute respiratory infection in the previous 30 days.
- ... and 2 more (see full listing online)

Exclusion (3)

- \. Participation in other research protocol involving therapeutic measures.
- Elimination Criteria:
- \. None.
