

# Repeat PET/CT Imaging in People With CAPS and Anakinra-Induced Amyloidosis Using an Amyloid-Reactive Peptide to Measure Changes in Organ-Specific Amyloid Load

NCT06974877

---

<b>Status</b>	RECRUITING
<b>Phase</b>	Phase 1
<b>Sponsor</b>	National Institute of Allergy and Infectious Diseases (NIAID)
<b>Enrollment</b>	30 participants

## Key Eligibility Criteria

---

### Inclusion (15)

- An individual must meet all the following criteria to be eligible for this study:
  - Aged 18 years and older.
  - Currently enrolled on NIH protocol 17-I-0016 with a documented diagnosis of MWS or NOMID.
  - Agree to allow data collected in this study to be shared with and stored on NIH protocol 17-I-0016 for that study s research analyses.
  - Developed skin thickening at the site of anakinra injection.
- ... and 10 more (see full listing online)

### Exclusion (6)

- Known hypersensitivity to 124I-AT-01, AT-01, or any of their excipients.
  - Known hypersensitivity to KI.
  - Pregnant or breastfeeding.
  - Currently receiving dialysis.
  - Currently taking heparin or heparin derivatives (eg, low molecular weight heparins) or other blood thinners for anticoagulation.
- ... and 1 more (see full listing online)
