

Early WAKE-up Predictors After Out-of-Hospital Cardiac Arrest

NCT06979700

Status RECRUITING
Sponsor University of Aarhus
Enrollment 250 participants

Key Eligibility Criteria

Inclusion (4)

- Age ≥18 years
- OHCA of presumed cardiac cause
- Sustained ROSC, defined as persistent signs of circulation and no need for chest compressions or mechanical circulatory support for 20 minutes
- Unconsciousness (GCS <9) (patients not able to obey verbal commands) after sustained ROSC at the time of randomization

Exclusion (18)

- Females of childbearing potential if pregnancy is suspected (unless a negative HCG test can rule out pregnancy within the inclusion window)
- Known bleeding diathesis (medically induced coagulopathy (e.g. warfarin, NOAC, clopidogrel) does not exclude the patient)
- Suspected or confirmed acute intracranial bleeding
- Suspected or confirmed acute stroke
- Unwitnessed asystole
- ... and 13 more (see full listing online)
