

# A Clinical Study to Investigate the Effect of Oral Neflamapimod on Motor Recovery After Acute Ischaemic Stroke

NCT06987643

---

Status	RECRUITING
Phase	Phase 2
Sponsor	EIP Pharma Inc
Enrollment	90 participants

## Key Eligibility Criteria

---

### Inclusion (5)

- Male or female participants must be aged 45 years or over at the time of signing the informed consent.
- Confirmed acute ischaemic stroke in the anterior circulation (middle or anterior cerebral artery) with onset of symptoms between 2 and 7 days prior to screening and evaluation.
- National Institutes of Health Stroke Scale (NIHSS) score between 5 and 20 (inclusive) and exhibiting unilateral motor deficit (i.e. motor NIHSS e 2 on affected side of the body).
- Fugl-Meyer Assessment of Motor Recovery after Ischaemic Stroke (FMMS) total motor components score of 80 or below.
- No history of learning difficulties that may interfere with their ability to complete the cognitive tests.

### Exclusion (10)

- Evidence of progressive or unstable stroke or intra-cerebral haemorrhage in the opinion of the investigator
- Participants needing carotid surgery within 3 months
- Ongoing major and active psychiatric disorder and/or other concurrent medical condition that, in the opinion of the Investigator, might compromise safety and/or compliance with study requirements.
- History of alcohol or drug abuse within the previous 2 years.
- Poorly controlled clinically significant medical illness, such as hypertension (blood pressure  $\geq$ 180 mmHg systolic or 100 mmHg diastolic); myocardial infarction within 6 months; uncompensated congestive heart failure or other significant cardiovascular, pulmonary, renal, liver, infectious disease, immune disorder, or metabolic/endocrine disorders or other disease that would interfere with assessment of drug safety in the opinion of the Investigator.

... and 5 more (see full listing online)
