

Coronary Sinus Reducer in Patients With Angina With no Obstructive Coronary Disease

NCT07010029

Status	RECRUITING
Phase	Not Applicable
Sponsor	Medical University of Warsaw
Enrollment	50 participants

Key Eligibility Criteria

Inclusion (2)

- Stable angina symptoms without significant obstruction of coronary artery (defined as coronary artery stenosis diameter $\leq 50\%$ or coronary artery stenosis diameter $>50\%$ and $\leq 70\%$ with FFR >0.8), with coronary microvascular dysfunction confirmed in invasive test (defined as coronary flow reserve ≤ 2.5 or index of microvascular resistance ≥ 25)
- No future options for antianginal therapy (maximum antianginal therapy for at least three months)

Exclusion (16)

- Vasospastic angina (positive test with acetylcholine),
 - Evidence of cardiac ischemia,
 - Coronary flow limiting myocardial bridge,
 - Severe valvular disease
 - Hospitalization for acute heart failure < 3 months
- ... and 11 more (see full listing online)
