

Contact Activation of Coagulation in Newly Inserted Central Venous Catheters

NCT07014722

Status	RECRUITING
Phase	Not Applicable
Sponsor	Thomas Kander
Enrollment	88 participants

Key Eligibility Criteria

Inclusion (4)

- Participants must meet all of the following criteria to be included in the study:
- Clinical indication for the placement of a two-lumen central venous catheter with length 150-160 mm.
- Age ≥18 years.
- Signed informed consent.

Exclusion (10)

- Participants meeting any of the following criteria will be excluded:
- Current use of anticoagulants or platelet inhibitors, except: Prophylactic low molecular weight heparin (LMWH), double prophylactic dose of LMWH, Acetylsalicylic acid (ASA).
- Prothrombin complex (pK/INR) outside the normal range (0.9-1.2), platelet count $<50 \times 10^9/L$ or haemoglobin $<80 \text{ g/L}$, if already available.
- Known coagulopathic conditions, including but not limited to:
- Activated protein C (APC) resistance,
... and 5 more (see full listing online)
