

A Clinical Trial of Elsunersen in Pediatric SCN2A-DEE to Assess Efficacy and Safety

NCT07019922

Status	RECRUITING
Phase	Phase 3
Sponsor	Praxis Precision Medicines
Enrollment	50 participants

Key Eligibility Criteria

Inclusion (3)

- Has a documented Gain of Function SCN2A variant confirmed through genetic testing.
- Has onset of seizures prior to 3 months of age.
- Seizure frequency of 4 or more countable motor seizures per 28-day during the Baseline Observation Period.

Exclusion (4)

- Has any clinically significant or known pathogenic genetic variant other than in the SCN2A gene, or a genetic variant that may explain or contribute to the participant's epilepsy and/or developmental disorder.
- Has bone, spine (eg, kyphosis, scoliosis), bleeding, or other disorder.
- Has received any experimental or investigational drug, device, or other therapy within 30 days or 5 half-lives (whichever is longer) prior to Screening, including any prior use of gene therapy.
- Is currently pregnant or breastfeeding or is planning to become pregnant during the clinical trial.
