

Nutritional Oleic Acid Modulation of adipose Cholesterol Metabolism in Patients Living With Obesity

NCT07027033

Status	RECRUITING
Phase	Not Applicable
Sponsor	Nantes University Hospital
Enrollment	40 participants

Key Eligibility Criteria

Inclusion (12)

- Individual who has given informed consent.
 - Female adult aged between 18 and 60 years (included).
 - Patient with obesity at inclusion, meeting the HAS criteria for bariatric surgery eligibility: BMI ≥ 35 kg/m² associated with a comorbidity or BMI > 40 kg/m².
 - European origin: For this pilot study, we need to reduce variability factors and focus the research on women of European descent only (having both parents identified by the patient as of European origin).
 - Effective contraception if sexually active, or abstinence, or menopause (criterion required for bariatric surgery).
- ... and 7 more (see full listing online)

Exclusion (13)

- Modification of diabetes treatment within the past month.
 - Ongoing or planned insulin therapy before bariatric surgery.
 - Modification of lipid-lowering treatment within the past three months.
 - Systemic corticosteroid therapy.
 - Antiviral therapy (HIV).
- ... and 8 more (see full listing online)
